The new Fujioh FES Series Range Hood

showcases designer looks. Designed and Made exclusively in Japan, behind its pleasing lines, a revolutionary Rectifier Panel and a silently powerful Turbo Fan work together to draw in cooking fumes from all directions. Tiny oil vapours are then trapped by a removable Silicon Coated Aluminum Oil Filter – For Easy Cleaning. The Oil Catch tray collects oils and fats emitted during cooking. The Energy-Saving Fujioh FES Series is a stylish performer that compliments the lifestyle for modern day homemakers.
